

## **CHAPTER V**

### **RESEARCH CONCLUSIONS AND SUGGESTIONS**

In this chapter, there were two parts that the researcher wants to present. The researcher wanted to conclude and gave some suggestion dealing with the research.

#### **5.1 Conclusions**

From the result of the research that has been described previously, the researcher concluded that:

1. There was significant difference in students performance in comprehending writing between the result of pre-test before giving the treatment and the result of post-test after giving the treatment for the eighth grade students of SMPN 8 Palangka Raya in academic year 2019/2020.
2. There was a significant effect in the students achievement, especially in their writing contents, and vocabulary. It could be seen from the result of post-test and questionnaire that most of students became more active, creative and communicative during the learning activity.

#### **5.2 Suggestions**

Considering to the result presented and analyzed in this research, there are some suggestion that the researcher would like to recommended as follows:

1. Since the students' score was still under criteria of minimum mastery level, the researcher suggested to the teacher to give more practice to the students in writing especially writing descriptive paragraph. The use of greeting card video and imitative writing technique in teaching writing greeting card made the students more creative.
2. For the teacher, the researcher suggested to use any attractive strategy, media and teaching method in the process of teaching and learning English. It could improve students' interest in learning activities. Also, this teaching method has some weakness, especially for students who hardly to cooperate with the other students. The researcher suggested to pay attention to this kind of student, so he/she can be more active in greeting card video and imitative writing learning process.
3. For the next researcher who is interested in conducting the same topic, it is suggested to add new variable, use more sample, and improve the instruments and also have to remind there are expending money to do this research but all the cost are worth it. Just do it!. JBU ☺.
